CATALOGUE 2014

Ideal STANDARD

A BEAUTIFUL USE OF SPACE

GENERAL CATALOGUE 2014

Ideal Standard International, the leading bathroom solutions provider, has been producing quality bathroom solutions for over 100 years. We've worked with some of the biggest names in product design, creating robust and reliable products which are not only beautiful but built to last.

Ideal Standard, the flagship brand of Ideal Standard International, offer products that match extensive consumer insights with designer intelligence and technological expertise. We pride ourselves in creating products that span the needs of all markets. Whether our customers are looking to fit-out a multi million Euro hotel or soccer stadium to fitting that small, space saving bathroom in a consumer household – we will always put the customer's needs first.

* Ideal Standard is continuously engaged in improving its products; we have the right to modify at any moment and without notice the prices, the technical and functional features of the products described in the general catalogue or other literature.

*All the published images are illustative only and may not show the product accurately or its details.

5. INDEX 582

Bathroom is the most personal space. It's the sanctuary where to refresh, revive or relax. It embraces with a feeling of physical and emotional wellbeing.

Dea's softer, more feminine lines create a personal space that cossets and cocoons.

Curved yet controlled, inviting yet elegantly poised, Dea's beautiful lines offer a perfect balance of chic, high-end design and pure pleasure.

Dea bathroom is a holistic experience, as every element creates an atmosphere of complete serenity.

SIMPLY U

SIMPLY U is the latest in cuttingedge bathroom design. A panoply of seamless forms, this state-of-the-art collection integrates effortlessly into any environment. Four architectural categories offer a range of options to reflect your personality.

Four distinct categories of ceramic masterpieces offer a world of shapes and sizes.
SIMPLY U basins contain the Idealflow hidden overflow system, which means a smoother, more appealing surface and easy cleaning.

Plus, a diverse range of taps SIMPLY U provides the perfect complement to your selection.
All you have to do is mix and match!

CONNECT

CONNECT offers four contemporary but timeless shapes which won't break the budget but will impress - geometric shapes, smooth lines or a bit of both.
A total concept to complete any space - big and small bathrooms, family and guest bathrooms, beauty pampering spaces...
CONNECT SPACE offers a clever use of unused and small spaces.
It creates space and gives an effortless sense of wellbeing.

CONNECT is just the right totalbathroom answer to different requirements.

PLAYA

PLAYA offers a linear design while conceptually remaining distinctly contemporary.

Wide surfaces and straight angles deliver a comfortable, relaxing bathroom experience, without compromising on style and design.

PLAYA comprises a wide range of washbasins, different types of toilets, bidets and pedestals as well as a range of furniture and accessories.

Shower Module ELEGANT

As stylish as it is comfortable: a wall-mounted rain shower as well as a hand shower with wall bracket ensure showering is a pleasure.
The thermostat allows temperature control.
Each shower head has its own volume control, which makes it possible to use them both separately or simultaneously.

Module Parts	Art.No.	Pcs	Price/ EUR
Built-in kit 1 Thermostat	A1500NU	1x	
Built-in kit 1 Universal	A1501NU	4x	
Mounting rail 60 cm	A1503NU	1x

Rain shower Idealrain 30 cm	B9443AA	1x	
Wall connection 37 cm	A1524AA	1x	

Bath Module ELEGANT

The elegant bath tub concept allows the bath to be filled by means of the overflow fittings and thus offers a reduced design which dispenses with a separate outflow.
A thermostatregulates the temperature.
Thanks to the separate volume control of the bath inlet and the shower head, they can be used both separately or at the same time.

Color description: AA - Chrome

Shower Module INDIVIDUAL

The shower concept with rain shower and integrated, automatic changeover to the hand shower on the water-conducting shower rail demonstrates active individuality in the bathroom at its best.
A thermostat takes care of optimum temperature control.
This concept also permits the vertical arrangement of the temperature and volume controls.

Module Parts	Art.No.	Pcs	Price/ EUR
Built-in kit 1 Thermostat	A1500NU	1x	
Built-in kit 1 Universal	A1501NU	1x

SOFT Bathtub

SOFT bathtub 180 x 80 cm, is an innovation, patended by Ideal Standard.
The walls of the bathtub soften with the warm water, to offer maximum comfort, while keeping the temperature of the water at the same levels for more time, compared to the ordinary bathtubs.
14 recessed flat airspa jets in the bottom provide gentle but effective hydromassage.
A wenge finish stand, equipped with the ri-mounted
Moments fitting, provide ease of access to the tub.
The innovative Ideal Waste system permits the hidden overflow.
Suitable as free-standing or fitted to the wall.

Necessary equipment:
The wenge finish stand is necessary, either for free-standing or fitted to the wall installation (T9741CT).

Product	W x D x H mm	kg	Art.No.	Price/ EUR

ARIDIAN waterless urinal

Water saving - 131 400 liters per year*
Shrouded outlet, including renewable cartridge 50 mm with outlet adapter
Fixing hangers and toggle bolts

NOTE: Cartridges last for approximately 7 000 uses
Installers must ensure that the urinals are connected to the waste pipe systes that are adequately vented!

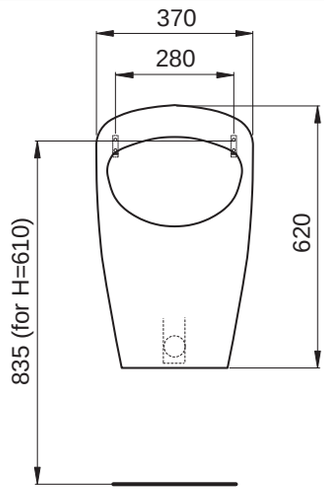
* Estimated saving per bowl, per year based on conventional urinal flushing of 2,5 liters, 6 time per hour, 24 hours per day, 365 days per year

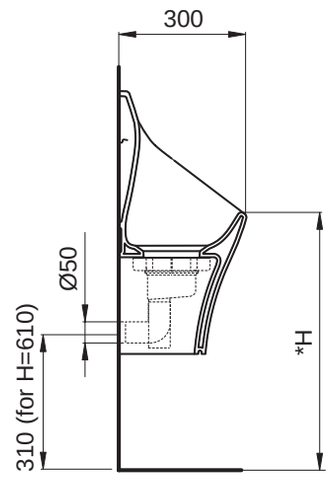
Replacement cartridge

Replacement cartridges for Aridian waterless urinal

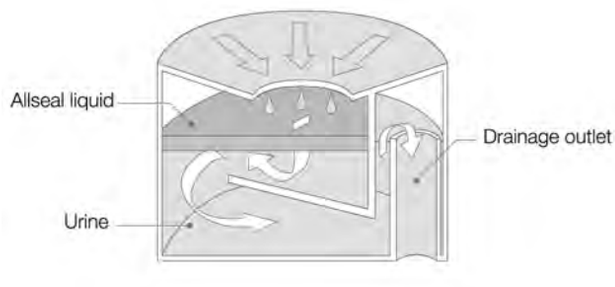
Product	W x D x H mm	kg	Art.No.	Price/ EUR
ARIDIAN waterless urinal	370 x 300 x 620	16,00	S631601	

Recommended optionals	Art.No.	Price/ EUR
Replacement cartridge	S628267	
Replacement cartridges (32 pcs in box)	S628367	





*Adultes H=610
Children H=500



Like many great ideas, Aridian is based around simplicity. Installed in minutes and lasting years, It requires only minimal maintenance. But how does it actually work?

Urine which is 96% water, flows down the surface if the urinal and into the unique Sealtrap cartridge. The cartridge is filled with special liquid called Allseal, which is not only perfumed, but prevents foul air from rising up from the drain and into the washroom. It does this by floating on the surface inside the cartridge and trapping any particles and the cartrgidge base.

The Sealtrap cartridge - urine flows down the surface of the urinal and into the cartridge which is filled with a special liquid called Allseal. Foul air is prevented from rising up from the drain and into the washroom.

PRIVO Siphon-action bathroom urinal

Concealed inlet and outlet, fixing holes for urinal cover
Flush 0,3 - 0,7 l / sec, at least 2 liters of water per flush

This toilet has been tested to withstand a static load of 600Kg for 1 hour -
exceeds EN static load test which is 400 Kg*
This load is equivalent to a person of weight 170kg, falling from 0.5m impact time 0.06 seconds
As with all wall hung bowls, use with care when transferring weight onto the bowl.
Any person exceeding 170kg , should use this toilet with caution, avoiding sudden drop or fall onto the product.
Grab rails are advisable for such people who may experience difficulty lowering themselves on to the bowl.
* As with all Wall Hung toilet bowls, ISI can not be held responsible for wall strength or frame strength.
If in doubt please seek specialist advise from your builder / installer.

CERAMIC MATERIALS

Vitreous china is made from a mixture of white burning clays and finely ground minerals which after firing at high temperature, and when unglazed, does not have a mean value of water absorption greater than 0.5% of the dry weight. This 99.5% vitreosity means that, even unglazed, it cannot be contaminated by bacteria and will remain hygienic. It is coated on all exposed surfaces with an impervious non-crazing vitreous glaze giving white or colored finish. Vitreous china is stainproof, burnproof, rotproof, rustless, non-fading and is resistant to acids and alkalis. To produce vitreous china (and fireclay) a solution of slip is prepared. Slip is the term used in the trade to define casting clay. The ingredients for vitreous china casting slip are ball clay, china clay, sand, fluxing agent and water.

The main characteristics of these products are:
- Water absorption capacity <0.5%
- Firing temperature: 1200ºC - 1220ºC
- Acid, base, hot water, stain impact, abrasion, thermal shock resistant
- Resistance to bending (500kg/cm2)

Fine Fireclay is made from a mixture of ground Vitreous China and Fireclay and has the advantage of holding shape better whilst manufactured. It is particularly suitable for products such as vanity basins and shower trays where it is important to achieve a flat base, whilst keeping the finish associated with vitreous china.

SEAT MATERIALS

Duroplast - the raw material is in granules form and based on special pressing moulds, at the temperature of around 150^0 C in 2 tone press.

Characteristics of Duroplast:
- Safety environment – no environmentally harmful substances
- Resistant to cigarette burn marks – in accordance to DIN 438-2.18 regulation
- Static Electricity – resistant to static electricity & this is why they repel dust.
- UV radiation – resistant to UV radiation - in accordance to EN 438-2.18 regulation.
- Durability – in accordance to EN 438-2.14 regulation, all seats are subjected to 150-kg endurance test.
- Chemical resistant – in accordance to EN 438-2.15 regulation

BRASS FITTING MATERIALS

The taps and mixers are made of brass of constant and controlled chemical content to meet the European standards. The brass has a low lead content significantly under the norm of 1.6%. The company guarantees customers the materials high quality without risk for health.

Coatings

In order to achieve the shiny surface the company uses the proven method of electroplating. Thanks to the modern equipment there are met the European standards EN 248, DIN 50021, ISO 9927, ISO 5002 and there are achieved a high quality nickel finish of 12.6 to 15.3 µ and a chrome finish of 0.327 to 1.470 µ. All plastic details are electroplated after being previously copper plated which assures the surface durability and its aesthetic look.

ACRYLIC MATERIAL

The quality of acrylic bathtubs and shower trays meets the highest requirements. All stipulated specifications are strictly observed and the production and our products are certified by TÜV. The TÜV certification symbol further certifies the exclusive use of the quality acrylic material according to DIN EN 263 European Standards. Furthermore, the acrylic products bear the AFNOR NF certification mark. The Ideal Standard bathtubs are, therefore, synonymous to exceptional quality.

- Scratch resistance
- Chemical/ solvent element resistance
- UV resistance (does not become yellow)
- Material sturdiness (does not break)
- Shiny appearance: glossy texture

CERAMICS

Space saving

Very often, the available space is decisive for the choice of the products. Some of the WC suites offered, are characterized with short projection (San Remo Short) & are extremely suitable for spaces, where every cm matters.

Water saving

Toilet cisterns have a capacity of 6 L & water flush volume control. The carefully engineered construction, provides high speed flush & a very good pan cleaning. The dual flush system, is another intelligent solution. All WC suites are equipped with such a system. The dual flush system, guarantees that no additional water is wasted, by choosing the long or short flush (6 Lt or 3 Lt), according to the needs, which is an effective way of saving water.

Low level of noise

The IS toilet cisterns, are equipped with a quiet water filling & flushing mechanism. This flushing system, is characterized by low level of noise, which is very important for Hotel bathrooms.

Soft Closing System for the toilet seat

The Soft Close automatic closure system, finally puts an end to noisy closing WC seats. Just a fingertip touch and the lid closes all by itself. Gently and silently, almost weightless. This technique offers safe, noiseless and gradual closing of the toilet seat. Installing a WC seat with Soft Close automatic closure, is just as simple as using it and it is also very reliable.

Hidden fixation

Visible holes are easily dirtied and spoil the total aesthetic picture of the bathroom ceramics. The hidden fixing system offers an attractive alternative and provides easier cleaning.

Ideal Flow

It is a hidden overflow system without a drain hole, for easy cleaning, better aesthetics without restrictions in the design and maximization of the free space of the furniture.

Ideal Plus

For an easy-to-clean, ever-shining surface, this treatment prevents water, lime scale and dirt from adhering to ceramics.

without IDEAL PLUS

Ideal Flow

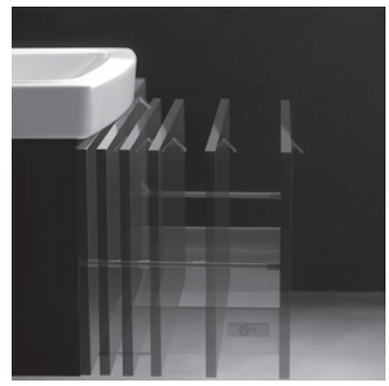
FURNITURE

Space saving

Very often, the available space is decisive for the choice of the products. Some of the WC suites offered, are characterized with short projection (San Remo Short) & are extremely suitable for spaces, where every cm matters.

Soft closing

Doors and drawers are equipped with a slowing device for slow and silent closing.



SHOWER ENCLOSURES

IdealClean finish

Makes glass easier to clean – and stay clean for longer.

IdealClean coating, repels water and helps prevent the build up of lime scale, making glass easier to clean and helping it stay clean for longer.

FITTINGS

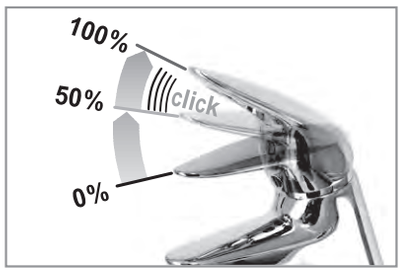
BLUESTART technology:

The Ceraplan III fittings feature a unique energy saving mechanism: "BlueStart" technology. This feature helps you save water, energy and therefore money by only delivering cold water, when the tap handle is in the middle position. This clever piece of technology means avoiding unnecessarily heating up water when you turn on the tap. The new Ceraplan III fittings also feature click technology which can help save up to 50% of water. By only opening the mixer until you feel slight resistance, you get only 5L of water per minute delivered, without any loss in the flow as the water is mixed with air as opposed to 9L/min when the mixer is fully open.

FITTINGS

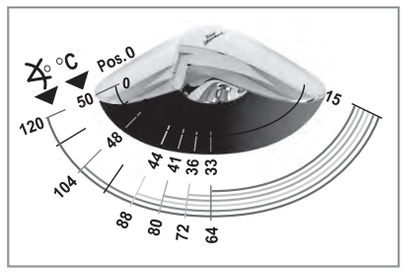
CLICK technology system

CLICK technology system offers easy temperature adjustment. With just one handle you adjust the pressure and temperature according to your individual desires, within a range of temperatures from 34° to 42°C. Thanks to the expanded movement range of 120o, you enjoy greater freedom to adjust water temperature. The adjustable water saving function gives you the opportunity to personally control water consumption.



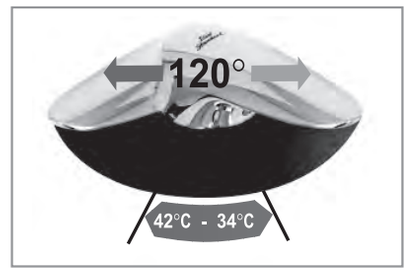
Adjustable water saving control (ECO)

The adjustable water saving function gives you the possibility to personally control water consumption. By raising the mixer handle until you hear a "click", water supply is adjusted to 50%; with just a slight push, water supply is adjusted up to 100%.



Safety

Temperature control of hot water: with the integrated temperature pin, water temperature can be reduced at any given time. With just a simple lifting and balancing of the red plastic ring in positions 1-7, the handle's range of movement is delimited and maximum temperature is reduced.



Comfort

CLICK technology offers exceptionally easy temperature control. Thanks to the range of movement of 120°, you have more options for simple and easy adjustment of the desirable temperature.

EASY-FIX placement system

The assembly is simple and quick:
The tap is assembled with one hand when the rubber membrane is on the "screw nut". The sealing component secures the best installation of the tap on the porcelain and perfect sealing.

TOP-FIX system

Installation with the Ideal Standard Top-Fix system follows simple steps.
A hexagonal key (allen) is enough to fix the mixer from the top of the porcelain.
Convincing advantages:
- easy fixing from top
- all fixing components are already assembled in the package
- tools included in the package
- fast assembly and, therefore, fast installation
- central water proof securing the best placement of the tap in the ceramic and perfect sealing

FITTINGS

Hidden Aerator

The hidden flow aerator in selected Ideal Standard mixers has a flow tip without visible slot. It is as reliable as a normal flow filter and, at the same time, it is safe against stealing. The replacement key is included in the product's package.

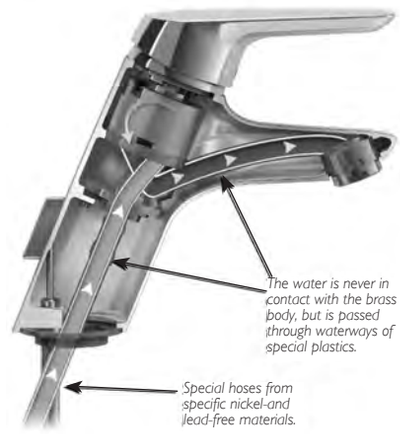
Cool Body technology

For complete safety, this superior technology means the thermostatic surface never heats up, keeping little fingers safe.

IdealPure® - a revolution in water hygiene

Ceramix Blue introduces IdealPure®: a unique nickel and lead-free design for basin and kitchen mixers used to draw water for cooking and drinking. It's the first fitting on the market with nickel-free waterways, anticipating and exceeding new European Drinking Water directives. Water passing through the IdealPure® system never touches chrome-nickel: copper pipes are unplated inside, while water-bearing surfaces are made from plastic.

Another innovative feature of Ceramix Blue is that the amount of water held in the fitting is reduced by 80%, so there is less water to flush through and reheat. That also means that there is 80% less water in the tap to stagnate and allow bacterial growth.



Water Efficiency

All CeraMix Blue taps are certified with the highest WELL (Water Efficiency Label) ratings, guaranteeing peace of mind that you're doing your for both the planet and your pocket. Flow rate and temperature are precisely controlled to ensure not a single drop of water goes to waste.

WELL
Water Efficiency Label

Classification scheme for wash basin valves

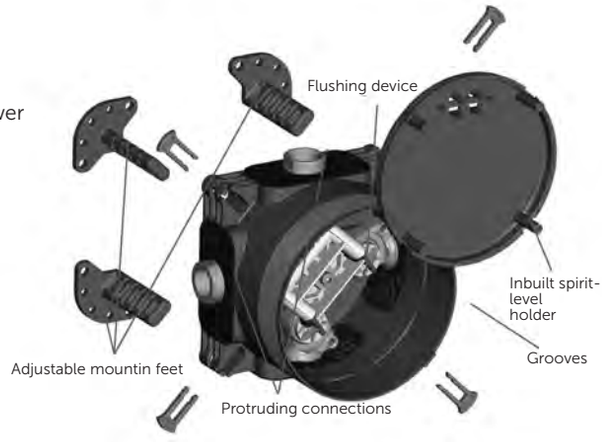
Evaluation criterion	Performed by	Evaluation
Volume (flow rate)	Pressure-dependent, restrictive solution > 6.0 l/min and ≤ 9.0 l/min	★
	Pressure-independent, volume-regulative solution ≥ 4.0 l/min and ≤ 6.0 l/min	★★
Temperature	Flow rate-independent temperature setting	★
	Temperature limit and cold water valves	★★

EASY-BOX BUILT-IN ADVANCED TECHNOLOGY

Ideal Standard has perfected its built-in installation technology in cooperation with a group of experts.* The new modular built-in EASY-Box leaves no room for further expectation. Thanks to its FAST-FIX mounting concept, installation is exceptionally easy and, above all, flexible. The DICHT-FIX waterproof system provides triple protection against water penetration both internally and externally, ensuring optimum sealing against damp. Choose between a single-lever mixer and a thermostat. Also available as an intrinsic safety version according to DIN EN 1717 standards (protection against pollution of drinking water systems) with a bathtub outlet safety device.** It also meets DIN 4109 (sound insulation in high-rise buildings) noise control category I standards.

Complies with the following norms and directives:
- DIN 4109 sound insulation in high-rise buildings, noise control category I.
- DIN 1988-compliant pipe flushing.
- Protects brickwork from damp.
- DIN EN 1717 with intrinsic safety models.**

KIT 1 Flexible basic built-in unit.
The small basic built-in unit is extremely flexible and adapts to all types of installation. Installation is effortless and requires no special tools. Bath/shower fittings and single thermostats can be mounted on the basic unit.



KIT 2 consists of a function built-in unit and visible design parts.

Function built-in unit: features technology specific to each model. Cartridge, switching device, check valve, shut-off device (inbuilt on thermostats, optional on single-lever mixers) and inbuilt gaskets - this unit offers it all! Also available as an intrinsic safety version (only in conjunction with Ideal Standard connections).

Thermostat
Long-lasting thermostat cartridge, side valves for pre-shut off with non return valve and DICHT-FIX.

Single-lever mixer
Choose between a bath and shower or shower fitting with CLICK-cartridge, hot water temperature control, ECO-function and DICHT-FIX.

Visible design parts: stylish fittings ranges.
The function built-in units can be combined with more than 30 fittings, offering total flexibility in design choice.

Shower single lever

Bath&Shower single lever

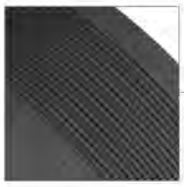
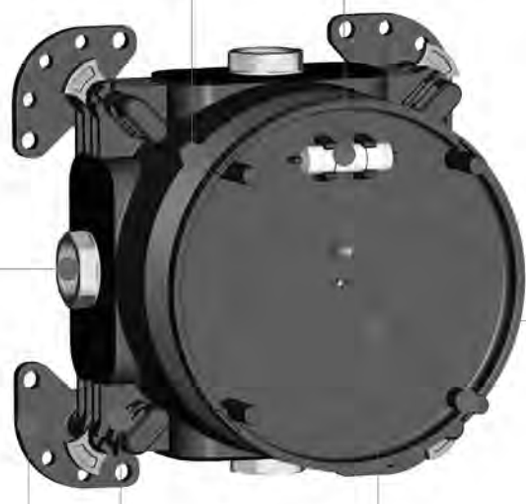
* Ideal Standard would like to thank all the experts and trade professionals who actively supported the development of EASY-Box.
** Only in conjunction with Ideal Standard connections.

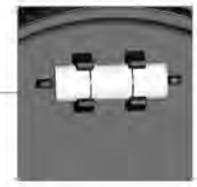
FAST-FIX THE INNOVATIVE FIXATION CONCEPT

FAST-FIX fixation concept ensures simple, effortless installation in every mounting possibility.



Grooves
The grooves facilitatetrimming of the protrudingparts of the box.





Cover
The cover contains a shortinstallation guide and anintegrated spirit-level holderto facilitate alignment ofthe EASY-Box.

Pipe connections
The protruding connectionsfacilitate the pipe attachmentwithout needing anyextension.

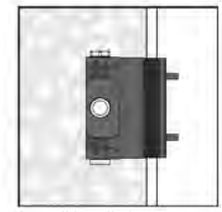
Support
The optimised spirit-levelholder enables accurateand reliable positioning both horizontally and vertically.

Fixation feet
The fixation feet enable simple mountingand progressive depth adjustment (up to 22 mm variation in the unit, plus 35 mm with the feet).

Fixation holes
The conveniently-positionedholes facilitate mountingin all installation positions.

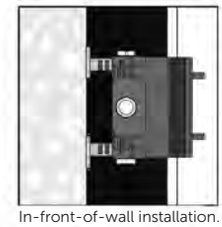
Flushing device
Loosening the internalhexagonal screw, theflushing device is releasedfrom the brass cross joint.

Installation possibilities



In-wall installation.

On-wall installation.

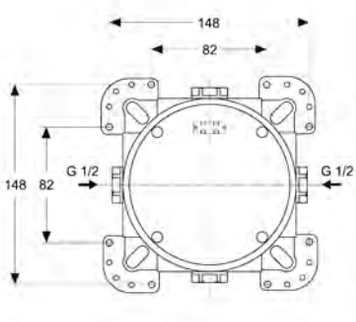


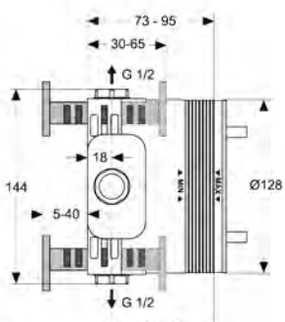
In-front-of-wall installation.

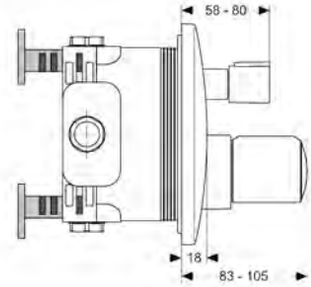
Installation on pre-carrier systems.

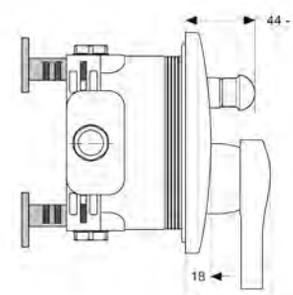
Installation on prefabricated cells.

Variable installation depth Between 73 and 95 mm.
The Kit can be adapted to various depths without any difficulty. Additional depth adjustment (5 – 40 mm) is possible thanks to the variable height adjuster. For excessively deep installations, special distance frames and extension sets are available.



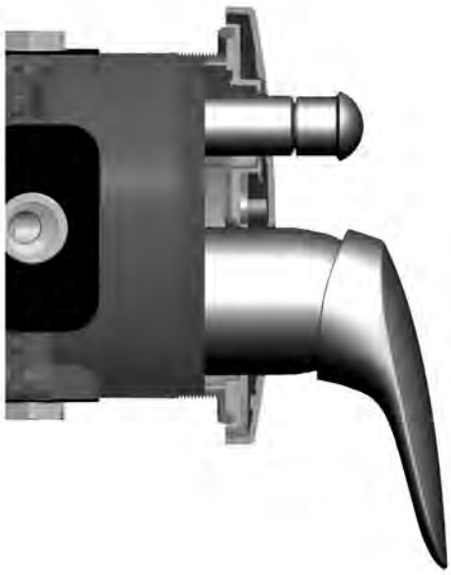






DICHT-FIX 100% WATERPROOF

The time-tested DICHT-FIX waterproof system has been further developed and now provides triple sealing for concealed units.



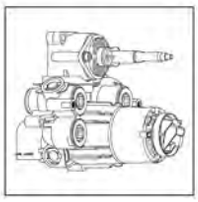
External waterproof – protection against splashing: the plate support protects the EASY-Box externally from splashing water. All openings are individually and reliably sealed.

External waterproof – sealing fleece: the sealing fabric replaces the former sealing frames and prevents water from soaking in.

Internal waterproof - inlays: additional sealings around the protruding pipes prevent any water from soaking from the EASY-Box into the wall.

Intelligent solution – squirted sealings: the plate support is manufactured in a 2-component die-casting process. Direct injection moulding ensures that the joints remain perfectly watertight.

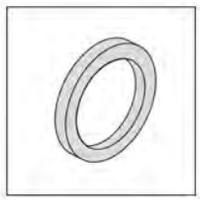
Accessories



Intrinsic safety model variants:
For item code number see model overview.

Shut-off devices for single-lever mixers:
A960706NU.

Cartridge for inverted connections:
EHM: A963462NU.
Thermostat:
A963606NU.



Distance frame for installations which are too flat:
A960705AA.

Extension set for installations which are too deep:
A960704NU.

Fast Installation

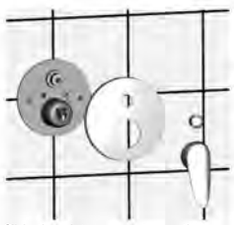
On-wall installation.
Connect the pipes.

Fix sealing fabric on ready plastered and pre-treated wall.

Rinse pipes using a pre-assembled flushing device.

Trim the protruding part of the box, turn off the water and disassemble the flushing device.

Assemble the function unit (thermostat or single lever body) from Kit 2 and verify watertightness.



Slide the plate support over the cartridge and the diverter and screw into the right position. Then mount the visible design parts.

READY! EASY-Box combines modern design with advanced technology!

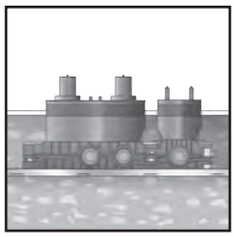
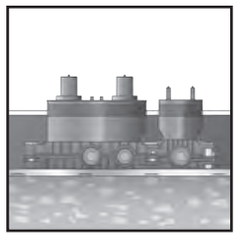
INSTALLATION VARIATIONS

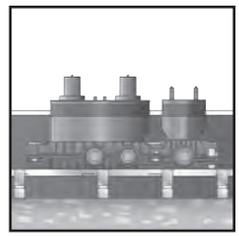
Up to five installation variations



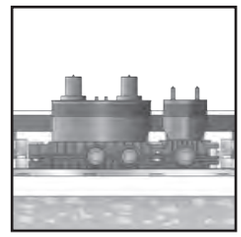
1. Installation in the wall



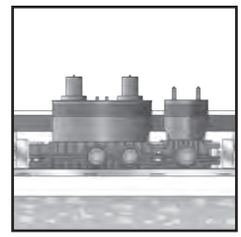
2. Installation on the wall



3. Installation on support proud of the wall



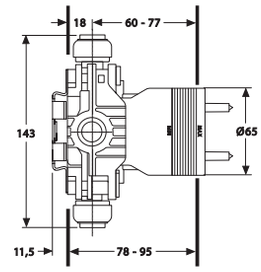
4. On-wall installation: assembly using bracket system



5.Installation on prefabricated bathroom units or bathroom pods

LOW INSTALLATION DEPTH

With a mere 78 to 95 mm, Archimodule offers one of the shallowest installation depths on the market.

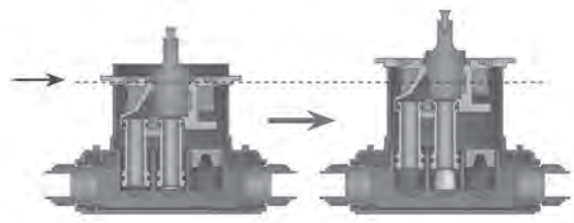


QUICK CONNECTION WITH SIMPLEX PUSH-ON FITTINGS

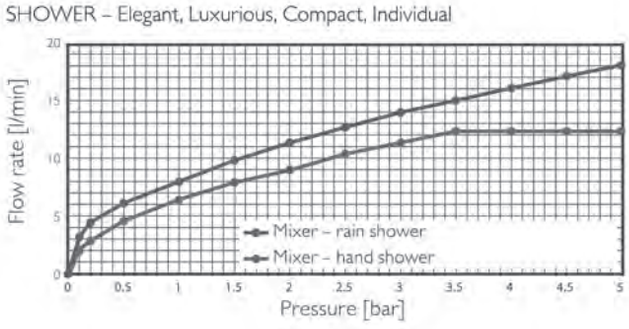
Simplex push-on fittings make it an easy job to connect up flush-mounted modules, simply and quickly. The push-on fittings you need are included with the modules, as is a special spanner to loosen them.

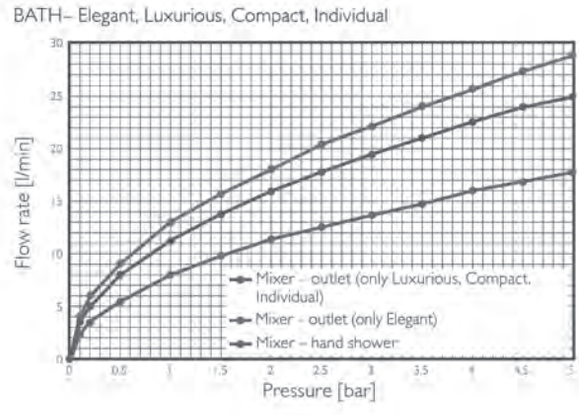
TELESCOPIC FUNCTION

The telescopic function permits different installation depths of up to 17 mm to be levelled up without difficulty.



FLOW RATES

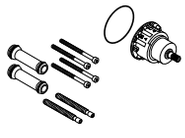




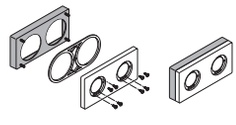
THE SOLUTION PROVIDER

Even if things don't go right at the first go - we have the right solution if things

Problem: Installation too deep (despite telescopic function)
Solution: Extensions for surface-mounted elements



Problem: installation too close to surface (despite telescopic function)
Solution: spacer



Problem: Hot and cold water connections reversed
Solution: minimum modification of existing components (possible even after installation)

Problem: cut-outs in tiles or wall too large
Solution: larger escutcheons

With our online configurator, you can assemble your personal design. Just go to: www.archimodule.idealstandard.com

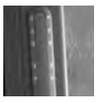
Air jets
Massage jets separated along the bottom of the tub. Their function is a gentle body massage in the area between the shoulders and the feet.

Dry jets /Neck massage/
Massage jets for the area of the shoulders and the back. They have two functions /fixed and alternative/ - vibrating or pulsating massage, thanks to a system of spheres, driven in a silicon membrane. The two functions are activated only when the jets are not covered by water.

Hydromassage jets
Massage jets separated at the both sides inside the bathtub, normally closed, with variable intensity. Extremely flat for maximum comfort, they provide a full massage in different areas of the body.

Flat Jets for feet
Water jets for the feet to stimulate reflex points.

The ozone therapeutic function
When the Ozone Function is activated, the whirlpool jets enrich the mixture of air and water in the bath with the therapeutic qualities of ozone. A naturally occurring purifier and sterilizer that is great for the skin.



Touchpad
The electronic touch sensitive keyboard allows you to activate and adjust all hydro-massage functions.

Diffuser
A valve which allows the air volume in the water to be increased. It gives a gentle massage.

Water Pressure Control
You can alter the water pressure simply by twisting the whirlpool jets.

Chromotherapy
Available in the Supreme Wellness System, Chromotherapy is a traditional eastern practise which enhances the health of the body and psyche through colour and light. Each shade contains a specific health benefit.

HYP Hygiene Plus System

Hygiene Plus System
Everything you need for a sublime experience. Multiple whirlpool flat jets with an attactive smooth surface for extra comfort and easy cleaning. Soothing high-pressure water streams. A built-in disinfectant system with a detergent reservoir. Plus the venturi monitor to regulate the quantity of air in the water. Pure joy.

CPS Combi Plus System

Combi Plus System
The Whirlpool Function sends equally powerful jets of water mixed with air from the sides of the bath. Together with Venturi, creating a rolling pattern of pressure between the jets for varied stimulation and even allowing sections of jets to be closed off for a more concentrated massage. This brings maximum pleasure of the body and creates perfect relaxing time for you.

TPS Twin Plus System

Twin Plus
Double the well-being. With twin function whirlpool jets and blowers working togetherto pump air simultaneously from thebottom and sides of the bathtub, thebenefits of hydromassageare maximised. Enjoy the sensation all-over wellness, surrounded by invigorating jets on all sides. Breathtaking.

SWS Supreme Wellness System

Supreme Wellness System
The ultimate whirlpool system. Pure pleasure. The definition of indulgence. With an enviable minimalist design it offers maximum comfort via all the latest innovations such as sleek, flat recessed jets with a mere 3mm projection, plus the unique Dry Jets massage feature. A blissful assault to the senses.
